

Multi-Award winning Dermalux® LED Phototherapy is the leading, non-invasive treatment that harnesses the power of natural light for visibly radiant, rejuvenated and refined skin.

Beautiful skin is achievable for everybody with Dermalux®. One treatment instantly energises skin cells to revitalise a dull and tired complexion. A course of treatment offers long lasting visible results, stimulating the skin's natural rejuvenation and repair processes to speed up cell renewal, resolve problem skin conditions and promote vibrant healthy-looking skin.

### **We are all influenced by the Power of Light**

Light has many positive effects on our bodies; it helps us to produce essential vitamin D, triggers growth, promotes wellbeing and makes our skin glow!

Phototherapy occurs naturally all around us and is based on the principle that our cells absorb light and use it to fuel natural rejuvenation and repair processes. Different wavelengths stimulate different effects in the skin. We know that on-going exposure to UV light is very damaging but controlled levels of Red, Blue and Near Infrared light are clinically proven to be beneficial.

A celebrity skin care favourite, LED Phototherapy is the application of these beneficial wavelengths into the skin's deepest layers to energise our cells with proven rejuvenating results. It is a natural response similar to that of plant photo-synthesis through a process known as photobiomodulation. Skin cells that are energised function better and can regenerate up to 200% faster which in turn leads to a more youthful, healthy and radiant complexion.

### **Dermalux® LED Phototherapy**

Dermalux® delivers skin specific treatments using combinations of clinically proven Blue, Red and Near Infrared wavelengths to boost collagen and elastin production, improve circulation, reduce redness and irritation and blitz blemish causing bacteria.

Utilising the latest generation LED technology, Dermalux® ensures a safe and targeted delivery of light at the optimum intensity for maximum skin enhancing results.

Dermalux® is heat free, chemical free and does not harm the skin. It has an excellent safety profile and is beneficial for all skin types without downtime.

### **The Treatment**

The Dermalux® treatment is a relaxing, pain free experience with proven mood enhancing effects. Enjoy some luxury me-time as your skin absorbs the energising light to kick start cell regeneration and restore radiance.

Each treatment lasts for around 20 minutes and with no downtime, you can simply get up and glow! As the light triggers a whole cascade of skin enhancing processes, the visible benefits continue even after the treatment has finished.

Dermalux® can also be used in combination with your regular skin treatments to upgrade and accelerate results. Your Dermalux® practitioner will advise you on the best combination depending on the condition of your skin.

## **Clinically Proven Wavelengths**

### **Dermalux® Blue Light**

Anti-bacterial action

Treats spots without irritation

Improves skin clarity

Calming effect for problem skin

### **Dermalux® Red Light**

Boosts collagen and elastin production

Reduces fine lines and wrinkles

Increases hydration

Evens skin tone and texture

Revitalises and restores radiance

### **Dermalux® Near Infrared Light**

Advanced skin rejuvenation benefits

Calms redness and irritation

Reduces age spots and pigmentation
